

PROGRAMMING XR RADIATORS

Once installed and connected, the radiator is on **STAND-BY** position.

Press the **ON/OFF** button to connect the radiator. Press **OK**.

To access the programming menu, press the **PROG.** button for 3 seconds.

If you wish to change the menu language, press the **HAND** button. Once the language is chosen, press **OK**.

When you see **HOUR** displayed, press **OK** in order to select the current time. Press the **UP/DOWN** buttons, select the hour and press **OK** to confirm. Select the minutes with the **UP/DOWN** buttons, and press **OK**.

Then **DAY** will be displayed. Select the current weekday. Press **OK (dd:Mo)** and with the **UP/DOWN** buttons select the current day and press **OK** to confirm.

Then, we choose the comfort temperature **t°C**, press **OK** and select the desired Comfort temperature with the **UP/DOWN** buttons. Press **OK**.

t° E is displayed, this is the Economy temperature, which should always be at least 3 degrees less than the Comfort temp. In order to choose the economy temperature, we press **OK** and we select the desired temperature with the **UP/DOWN** buttons. Press **OK** to confirm.

Your radiator has 7 pre-programmed plans that you can look up on the instructions manual. In order to select it, **PLAN** will be displayed, with the **UP/DOWN** buttons please select the plan that adapts the better to your needs, then press **OK**. On the screen it will appear the time your desire plan starts, press **PROG** to finish.

CONFIGURE YOUR PLAN TO YOUR NEEDS - PLCF

Haverland's radiators allow setting a plan that adapts to your needs. We are going to program a period of comfort from Monday to Friday (L-V).

P1=07:00 to 08:00

P2= 21:00 to 23:00

P3= 00:00 to 00:00

We press **PROG** for 3 seconds. Pressing the **UP/DOWN** buttons we choose inside the menu the **PLAN** option and press **OK**. On the screen we see **PL01**. We search the bespoke plan **PLCF** pressing the **UP/DOWN** buttons, and press **OK**.

We choose the starting time for the **first comfort period (red sun light ON)** from Monday to Friday with the **UP/DOWN** buttons **07:00**. Once selected (hour and minutes) we press **OK**.

Now we choose the finishing time for the first period (P1), with the UP/DOWN buttons we select **08:00 (green moon light ON)**.

We repeat the same process for P2; first we set 21:00 whenever the SUN is on. Then, press OK and set 23:00 (MOON on).

If you don't want to configure more comfort periods, you must bear in mind that the period P3 should stay 00:00 – 00:00, and we press OK so the period works correctly. If on the opposite you wish to configure another period, you must repeat the same steps as in the first period.

In order to program the weekend period (S-D) you must repeat the same steps we followed before. When you finish your programming please press **PROG and make sure that the HAND light is off** (if it's ON you should press the HAND button)

When the temperature of the room is displayed, you will see on the bottom of the screen either the sun light on (red) or the moon light (green). If the sun is on, the programming is on COMFORT temperature. If it's on the moon, it's on the economy temperature.

If you wish to re-set the hours of the PLCF program, you will have to access the menu again and repeat the same steps as before.

BUILT-IN ENERGY MONITOR

Haverland's radiators have an energy monitoring function so you can monitor energy use. In order to access to this feature, please press PROG for 2 seconds. Press UP until you see WAT on the screen and press OK. The figure that appears on the screen (003.3), is the real energy use in Kilowatts (3.3 KW).
