

# Programming your Haverland RC Wave

## Setting the date/time

To enter the programming mode, hold the ⏻ standby button until the screen changes (5-10secs)

Press the ⏻ standby button again once.

The time will appear with numbers on the right hand side which will flash 1-7 (each number represents a day. i.e. 1 is Monday, 2 Tuesday etc.) Set to the correct day using + -

Press the door icon to set the hour with +-

Press the door icon again to set the minutes with +-

Press the door icon to exit.

## Setting the temperature for each mode.

☼ Set Comfort mode to the desired temperature using + -

This is the mode to use when you need warmer heating e.g. morning and evening.

Recommended setting 18-21C

Then press the door icon to move to the next mode.

☾ Set the economy mode to the desired temperature using + -

This is the mode to use when you don't require as much heating e.g. afternoon or night.

Recommended setting 14-18C

Then press the door icon to move to the next mode.

❄ Set the frost mode to the desired temperature using + -

This is the mode to use when you don't require heating at all.

Press the door icon again to exit.

### Programming your radiator schedule

To enter the programming mode, hold the ⏻ standby button until the screen changes (5-10secs)

It'll start on 00:00 on Monday (1 on the right side)

Select Ⓢ economy mode by using +

Press the door icon to go through the hours until you get to the hour which you require the heating to go on (e.g. 6/7am)

Press + to set to ⚙ then go through the hours (using the door icon) until when you don't require heating. (e.g. 9/10am)

Press + to set to Ⓢ or ⚙ until you require heating again (e.g 5/6pm)

Press + to set to ⚙ then go through the hours (using the door icon) until when you don't require heating. (e.g. 10/11pm)

Then continue the steps for day 2-7 and press ⏻ standby to finish.

And now your radiator should be fully programmed, if you require assistance please call
